

ABGC CERTIFICATION EXAMINATION REFERENCES

The references listed below are intended to familiarize you with some representative materials that relate to the field of genetic counseling. This list is not intended to be inclusive of all materials that may be useful to you in preparing for the examination nor does it represent all of the references that may be used in the development of the certification examination. Rather, the presented references are provided only for guidance.

The inclusion of any reference does not constitute an endorsement by ABGC or any of its officers or representatives. Additionally, ABGC is not involved with and does not endorse any preparatory courses for candidates who take an ABGC certification examination.
